**Phone:** 303-692-3429 and 303-692-3328

**Agency:** CDPHE

**Purpose of Contact:** Moratorium on reseedling

**Discussion** Because of the continued drought conditions, with the exception of the B889 project (IHSS Group 800-6), we will not be placing topsoil or reseedling remediated areas until the fall when weather conditions are more favorable for seed germination and survival. Until informed otherwise, remediation sites will be left backfilled and roughly regraded. Because the backfill is compacted, it is not anticipated that it will be mobilized during adverse weather conditions. However, additional controls will be evaluated on a case-by-case basis when high winds are predicted.

Topsoil placement and reseedling is still a required part of the ER remediation projects. While activities will be dependent on weather and Site conditions, the remediation project sites are anticipated to be revegetated by November 15<sup>th</sup>. However, if drought conditions continue into the winter, the situation will be re-evaluated with Elizabeth and Dave as well as the Site's RISS Environmental and Ecology groups to determine if further changes are required. Final regrading, topsoil and vegetation will be deferred until weather conditions are more favorable.
